

Rukhmai Parshad

Python & Django Developer — Full Stack / Backend

☎ +917404544191 ✉ rukhmaiparshad@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Delhi, India

PROFESSIONAL SUMMARY

Python and Django developer with **8 months of full-stack internship experience** and **four independently built and deployed applications**, specializing in **REST API development** and **JWT-authenticated backend systems**. Proficient in **Django REST Framework**, **Django ORM**, and relational databases including MySQL, MS SQL Server, and SQLite. Seeking an entry-level Python / Django / Backend Developer role.

WORK EXPERIENCES

Python Full Stack Development Intern | Internship

Jul 2025 - Mar 2026

EDC Info-Net Software Solutions Pvt. Ltd.

Karnal

- Delivered **6+ projects** during the internship, focusing on **backend development** and database-driven applications, receiving an 'Outstanding' evaluation for practical ability and technical delivery.
- Standardized data access by replacing raw SQL queries with **Django ORM**, establishing a consistent data-access layer across the application.
- Managed sprint-based feature delivery over **8 months** using **Git/GitHub** for version control and code review.

Technologies / Skills Used : Python, Django, HTML, CSS, JavaScript, Bootstrap, MS SQL Server, SQLite

PROJECTS

BizMind — Business Decision Intelligence Platform | 🐙 Github 🔗 Live Demo

- Developed and deployed a **Django REST Framework** backend processing **3 dataset types** (Sales, Marketing, Finance) through a **4-stage pipeline**: upload, validation, processing, and decision.
- Secured REST API endpoints with **JWT authentication** and implemented permission-based access control for user-level data isolation.
- Implemented pagination and filtering on API endpoints, documenting the full API with **Swagger/OpenAPI** using drf-spectacular.
- Tested all API endpoints in **Postman** and deployed the production-configured application live on **Render** using Gunicorn and WhiteNoise.

Technologies / Tools Used : Python, Django, DRF, JWT, Swagger/OpenAPI, Postman, Pandas, NumPy, Render

ClientFlow — Client Requirement Intake Tool

- Developed a guided, multi-step requirement-discovery workflow using **modular JavaScript** with client-side validation and browser persistence.
- Produced structured, developer-ready project briefs from raw client input through a responsive dashboard UI, deployed on **Vercel**.

Technologies / Tools Used : HTML5, CSS3, JavaScript, LocalStorage

Invoice Processor — Intelligent Document Processing | 🐙 Github 🔗 Live Demo

- Developed a **Python pipeline** using **pdfplumber** to extract and classify structured data from invoice PDFs, including handling invalid or corrupted files.
- Implemented multi-invoice support and robust error handling for missing or incomplete information, producing structured Excel outputs with **OpenPyXL**.

Technologies / Tools Used : Python, Django, Pandas, pdfplumber, OpenPyXL

ReconIQ — Data Reconciliation Engine | 🐙 Github

- Developed a **Python reconciliation engine** to identify record- and field-level mismatches in CSV/Excel dataset imports.
- Stored reconciliation jobs and audit history in MySQL, producing exportable **CSV, Excel, and JSON mismatch reports** for a queryable job history.

Technologies / Tools Used : Python, MySQL, Pandas, OpenPyXL

SKILLS

Languages :

Python, SQL, JavaScript

Backend & APIs :

Django, Django REST Framework (DRF), REST API Development, JWT Authentication, CRUD Design, Pagination & Filtering, API Documentation (Swagger/OpenAPI via drf-spectacular)

Databases :

MySQL, MS SQL Server, SQLite, Django ORM

Frontend :

HTML, CSS, Bootstrap

Tools & Deployment :

Git, GitHub, Postman, Render, Gunicorn, WhiteNoise, Vercel

Core CS :

OOP, DBMS, Data Structures & Algorithms, Operating Systems, Computer Networks

EDUCATIONS

Govt. College for Women, Karnal, Kurukshetra University

2025

Bachelor of Computer Applications (BCA)
